

# 10 things you need to know about Top Dog's pure polyurethane (PU)

- 1 Industry leading durability.**
  - **Reusable.** Day after day, week after week, month after month. MANY cycles.
  - **Tear and puncture resistant;**
  - **Top Dog products last longer.**
- 2 Industry leading Food safety; enhanced anti-microbial formula and colour coded:**

100% food safe; FDA, CFIA, EU compliant. Our products are made from 100% pure polyurethane that is naturally resistant to the growth of micro-organisms. Additionally, Top Dog offers the most product colour choices in the industry.

  - **Aligns with Colour Coding and HACCP initiatives.**
- 3 Industry leading customer service.**

Top Dog takes great pride in meeting needs of customers. Timely order fulfillment and product customization set us apart.
- 4 Will NEVER crack:**

Many other materials used for protective clothing will crack, creating additional hosts for mold and bacteria.

  - **TOP DOG products will NEVER CRACK!**
- 5 Washer and dryer safe:**

Easily clean in a regular washing machine. Dryer safe to 82c; Additionally, PU does not absorb any moisture, so you can also tumble in a dryer with no heat, or simply hang to dry.
- 6 100% Recyclable. ♻️**
- 7 100% resistant to fats, degreasers, cleaning chemicals and water:**

Excellent protection against these four elements (and many other fluids/chemicals), which are always in existence in food processing facilities.

  - **Top Dog Pure polyurethane apparel lasts longer.**
- 8 Supple at any temperature:**

Will stay soft/supple to -65c. Perfect for cold weather applications.
- 9 Extremely light weight and comfortable:**

Easy to wear apparel equals increased productivity.
- 10 Pure PU is slick:**
  - **Virtually zero abrasion.**
  - **Nothing sticks to (or stains) PU;** grease, food/processing waste, glues, etc.
